Tyler King

Developing solutions through experience.

experienced programmer | father | motorcycle enthusiast

@ me@gnikyt.com / 🌐 gnikyt.com / gnikyt

Currently	Seeking full time employment and available for hire.
Specialization	Developing backend systems, Shopify-powered applications, and integrations between platforms/legacy systems.
Language Proficiency	Golang, Javascript/Typescript, PHP, Python, Ruby, CSS/SASS, databases, & more.
Tooling Proficiency	Shopify, Wordpress, Rails, Laravel, Symfony, Express & Koa, Docker, servers, CI/Actions, & more.
Other Skillsets	React Native (BLE & NFC communications) to embedded hardware systems.
Programming Values	I adhere to the principle of simplicity and focus in all of my code. Each component should serve a single, well-defined purpose to ensure clarity and maintainability. This approach leads to a stable and scalable codebase that can evolve over time. I consistently apply best practices such as the SRP/DRY principles, CQR Segregation, and more to achieve this objective. As well, I believe in always learning and listening - self improvement crafts better code.

Career Experience

Shopped, Toronto, Canada   Dec 2023 - Feb 2025
| *Role: CTO*

Founded in 2023 by three friends with deep roots in the Shopify ecosystem, with 30 years of combined Shopify agency experience. Valuing client relationships built on trust and communication, we craft development-focused solutions for anything Shopify… themes, apps, integrations, and consulting.

Little Rocket, Toronto, Canada   Jan 2014 - Nov 2023
| *Role: Development Director*

Leading a team of developers within our full-service agency, revolving around the Shopify platform for medium to enterprise clients, as well
